

Zakaria Merabet Ayache

FULL-STACK WEB DEVELOPER

+213 666 928 006 | zakiamerabetayache@gmail.com | Kerkera, Skikda, Algeria |
github.com/zakiamerabetayache

PROFESSIONAL SUMMARY

Full-stack web developer with nearly two years of freelance experience delivering production-ready web applications for local agencies, public-sector organizations, and private companies. Strong in React, JavaScript, TypeScript, Laravel, Express.js, Prisma, PostgreSQL, and MySQL, with practical experience building management systems, registration workflows, administrative dashboards, REST APIs, data import/export, and responsive user interfaces. Master's graduate in Electronics specializing in Embedded Systems.

TECHNICAL SKILLS

Frontend Development: HTML5, CSS3, JavaScript (ES6+), React.js, Next.js, Vite, Ant Design, shadcn/ui

Backend Development: PHP, Laravel, Node.js, Express.js, RESTful APIs, Prisma ORM.

Databases: MySQL, PostgreSQL .

Tools :Git , GitHub.

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Web Developer | Local Agencies | Algeria | Nearly 2 years

- Collaborated with local agencies to design, develop, and deliver real-world web applications and internal management tools.
- Built business and public-sector systems including mission/order management, childcare center management, registration platforms, residence management, payment and prestation tracking, reporting workflows, and other administrative applications.
- Developed reusable CRUD workflows with searchable and paginated tables, data-entry forms, validation, role-based permissions, and administrative dashboards.
- Worked across frontend and backend layers, including API integration, database operations, authentication, reporting, and document/data export.

SELECTED PROJECTS

Registration Platform for Organizations and Political Parties | React, Laravel, MySQL, Ant Design

- Designed and developed a structured registration platform supporting application workflows and centralized administration.
- Built a configurable multi-step registration form with national identification validation to improve data quality.
- Implemented a role-based administrative dashboard with tiered permissions, privacy controls, and consent tracking workflows.

TrackLife - Personal Productivity and Habit Tracking App | Next.js, Node.js, Express.js, Prisma, [GitHub](#)
PostgreSQL, shadcn/ui

- Developed a full-stack productivity application for tracking daily and weekly goals, sleep, work hours, achievements, and habit streaks.
- Designed the application around structured daily records and progress tracking to help users monitor consistency over time.
- Implemented the frontend and backend architecture, database schema, and API layer using Next.js, Express.js, Prisma, and PostgreSQL.

EDUCATION

Master's Degree in Electronics - Specialization in Embedded Systems.
